Authorization for this examiner's amendment was given in a telephone interview with Reitseng Lin on September 8, 2006.

The application has been amended as follows:

The withdrawn claims 6-11 have been canceled to place this application in condition for allowance.

2. The following is an examiner's statement of reasons for allowance:

The independent claim 5 is directed to an apparatus for isolating a noise intolerant device from a source of noise and identifies the distinct features: "wherein said buffer: having a first OR gate and a second OR gate, each of said first and said second OR gates having a first input coupled to said output of said IIC bus expander, a second input of said first OR gate coupled to a clock signal path of said IIC bus, and a second input of said second OR gate coupled to a data signal path of said IIC bus, and an output of said first OR gate, being said clock output of said buffer, coupled to said clock input of said phase-lock loop, and an output of said second OR gate, being said data output of said buffer, coupled to said data input of said phase-lock loop". All references of record, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
